About Company

Epic Systems is a leading independent Information Technology services company dedicated to delivering innovative business and technology solutions to clients worldwide. With a team of exceptionally talented and experienced professionals, we are committed to providing cutting-edge technology across various sectors, including business, education, industry, communication, and beyond.

CEO

Hisham Abdel Maguid has an Engineering Degree from Columbia University (Industrial Engineering & Operations Research). Acquired 27 years of software, marketing, sales and general management experience in IT and Manufacturing. Worked 10 years for IBM (USA & Middle East) in IBM's Information Systems department. **Eng. Hisham Abdel Maguid** held several Executive posts for Industrial companies.

Our Mission

To deliver unparalleled IT services and solutions that are tailored to meet the unique needs of our clients. We are dedicated to building long-term partnerships based on trust, integrity, and professionalism, and to providing our clients with the support and guidance they need to navigate the ever-changing landscape of technology. Our goal is to empower our clients to achieve their goals and shape their futures by providing them with the latest technologies and progressive solutions, while delivering exceptional service and exceeding expectations.

Our Vision

To be a leading provider of innovative IT solutions that help businesses around the world to grow and thrive. We aim to be the partner of choice for organizations seeking to harness the power of technology to drive growth and success.

CUSTOMERS REGION

At Epic Systems, we specialize in providing cutting-edge AI services and solutions that help businesses across a wide range of industries to harness the power of data and enhance their operations. Our team of expert data scientists and engineers leverages advanced AI technologies to deliver personalized, scalable, and impactful solutions that drive business value. Our AI services cover a wide range of applications, including predictive analytics, natural language processing, computer vision, and machine learning. For example, our predictive analytics services help businesses to forecast future trends, identify hidden patterns, and gain insights into customer behavior, while our natural language processing solutions enable organizations to analyze vast amounts of unstructured data, extract meaningful insights, and improve communication with customers. We also offer computer vision solutions that enable businesses to automate processes, identify anomalies, and improve quality control, as well as machine learning solutions that empower organizations to build intelligent systems, make better decisions, and reduce costs. At Epic Systems, we are dedicated to delivering innovative, reliable, and cost-effective AI solutions that help our clients stay ahead of the curve in today's rapidly evolving business landscape.
